

# WELCOME TO OUR CLASSROOM

*"Imagination does not become great until human beings, give the courage and strength, use it to create"  
---Maria Montessori---*

### Welcome Back

I hope you all had a great break. The children have all returned with smiling faces and eager to be back in the classroom. I would also like to welcome our new friend Chloé and her parents Amorette and Richard.

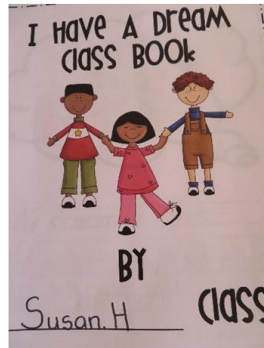

### Science Experiment

This salt and ice experiment encourages children to do some critical thinking. The penguins are trapped, and children are using salt and warm water to melt the ice and free the penguins.

### My dream is .....

In our first week back, we talked about Martin Luther King. He led peaceful protests to fight for the rights of all people. Then we shared our dreams with each other and created a book about it.

### Some action pictures

Please be respectful with the PICTURES that I share in the newsletters, don't share on social media. Thanks

Blair; wood polishing

Louie; making a Pompom

### Take Care of our Classroom

Practical Life lessons in a Montessori Classroom are purposeful activities. These lessons help children develop motor control, coordination, concentration and help children gain a sense of responsibility and independence. Some examples are taking care of the plants, animals, yourself and your environment. I created a Job Chart with pictures and Helping Hands. Children are going to be responsible for a job.
