

WELCOME TO OUR CLASSROOM

The greatest gifts we can give our children are the roots of responsibility and the wings of independence.

---Maria Montessori---

Welcome Back

Palmer and Blair are making the Montessori Christmas Tree by using the Pink Tower, Red Rods and the Knobless Cylinders

We hope you all had a great winter break. We hope that your new year is filled with love and laughter. The start of the new year started a little rocky. Thank you for your love and support. Together we are better.

If you should ever have any questions, please feel free to email me or call the teachers' line. It has been hard for us to not talk with you face to face every day, but we can still have great communication.

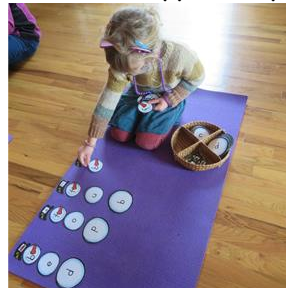

Science experiment

This salt and ice experiment encourages children to do some critical thinking. The animals are trapped, and children are using salt and warm water to melt the ice and free the animals.

Some action pictures

The last couple of weeks we have been learning and talking about winter, animals in winter and different types of penguins

Ayla is making words by building a snowman.

Edith is matching big and small snowflakes by using a magnifying glass.

Blair is creating a Winter Art project.

Finally some snowy fun on the playground.

Take care of our Classroom

Practical Life lessons in a Montessori Classroom are purposeful activities. These lessons help children develop motor control, coordination, concentration and help children gain a sense of responsibility and independence. Some examples are taking care of the plants, animals, yourself and your environment.
