

WELCOME TO OUR CLASSROOM

The goal of early childhood education should be to activate the child's own desire to learn.

---Maria Montessori---

Parent Teacher Conference

Thank you for taking the time to meet with me about your child. We are all working for the same results - a positive and successful Montessori experience for your child. If you have any further questions, please feel free to call or email me.

Unit Study

Unit studies are collections of learning activities tied to a theme. They provide a hands-on approach to learning that incorporates subjects such as math, science, language, art and songs/poems. We had a dinosaur unit in our classroom the last couple of weeks.

Science experiments

Frozen Dinosaur egg, Geneva is using warm water and an eye dropper to get the dinosaur out of the egg.

We love doing science experiments, so we did some more: Volcano eruption, sink & float and magnetic & non magnetic.

Please be respectful with the PICTURES that I share in the newsletters, don't share on social media. Thanks
